Gather More Information With Less Effort.

Putting captured data into motion.

Discover a capture solution that delivers the ability to create dynamic web forms. GlobalCapture 2.1, featuring GlobalForms 10, transforms everything from scanned images to email - and now custom web forms - into high value business information with less effort.

Here are 6 new key features and why they matter to you!

Reduce the time and expense of workflow design with GlobalCapture's own process management engine.

Enhanced business process automation allows for document routing and approval, prior to releasing to a repository.

Send captured data to a document management system or release data to your file system and 3rd party applications.

RapidAdapt® Forms Learning trains GlobalCapture to automatically recognize, classify, and extract data on unique document formats.

GlobalForms is now fully integrated with GlobalCapture, creating one workflow platform for reviewing all captured information.

Featuring a new library of customizable forms, GlobalForms 10 now has robust styling options, providing an improved user experience.
