> How does it work?

GlobalCapture® Convey is a very flexible tool for capturing and distributing documents intelligently, helping your company to have more efficient workflows and greater productivity.

> Key Points and Benefits

With GlobalCapture® Convey, users can transform paper-based activities into processes compatible with workflows, drastically reducing the cost and effort involved in capturing documents from any scanning device.

Friendly

GlobalCapture® Convey has a friendly design platform with web interface for the creation of workflows.

Flexible

GlobalCapture® Convey provides a concurrent licensing model that has no limits on page capture volumes and allows you to add processing capacity or users to your license profitably.

Mobile

Access the interface of the application from anywhere through any modern browser. GlobalCapture® Convey has web technology and a comprehensive graphic designer allowing access from any point in your network.

Scalability

GlobalCapture® Convey is designed to evolve with the needs of your company. You can add additional processor cores for high-volume environments or add features such as email capture to increase the capacity of your solution.

> GlobalCapture® Convey PLUS ... gives you more !!!

All the functionality of GlobalCapture® Convey:

The Convey PLUS option includes all the functionality of GlobalCapture® Convey as all capture, conversion, extraction, routing, notification and distribution capabilities.

OCR extraction by position:

For environments with documents of consistent format, you can easily create templates to extract data according to your location within a specific area of the document.

Classification of documents:

Increase the data extraction speed based on templates by identifying documents during the process through predefined attributes and applying the correct template for the extraction and identification of data.

Rapid Adapt learning forms:

Expand the flexibility of template-based OCR processes with Rapid Adapt Forms, which allow users to adapt the system easily to new or modified documents for which no template exists.
