Get Updated

Eliminate the risks in the processing of Accounts Receivable, boosting company-wide productivity and streamlining order distribution.

Accounts Receivable Automation with GlobalSearch ECM

Challenges

❌ Slow, manual data entry of orders into the system

❌ Difficulty producing signed proof of delivery receipts

❌ Delayed cash receipts for open invoices

❌ Improper document maintenance & records retention

Solutions

✅ Reduce order processing costs through data capture

✅ Provide quick, easy access to POD information

✅ Reduce Days Sales Outstanding

✅ Increase levels of cash flow through prompt payments

✅ Ensure records retention compliance

Benefits

Capture
Allow users to quickly batch scan, email, drag and drop or use a capture workflow to import AR documents directly into document management software.

Customer Service
Immediate access to documentation related to clients, such as account information, purchase orders and pending invoices.

Distribution
Sales orders automatically routed to the appropriate departments for approval and processing.

Tracking
Easily track a customer's credit and payment terms by instantly pulling up all documents sharing that client's customer number.
