> Benefits

Mobility & Flexibility

With access to documents from any mobile device, GlobalSearch® keeps processes consistent and your team productive

Document Capture Automation

GlobalCapture® is the unique document processing solution that brings together all data capture points into a single, easy to use platform. Eliminating the need for manual intervention, GlobalCapture® uses intelligent batch separation, image cleanup, optical character recognition and barcode recognition to automatically detect and extract information.

Integration Capabilities

GlobalSearch® integrates with the leading business application programs including QuickBooks®, DropBox®, Salesforce®, Microsoft Dynamics™ and more. In addition, you can gain full capture-and-retrieval support right from the control panel of your office multi-functional printer, which acts as the catalyst for workflow automation.

Business Process Management

GlobalAction® is the next generation solution for document workflow automation. This Business Process Management (BPM) engine provides the ability to map document processes on a drag & drop design canvas, automating actions. From automated email notifications to timed event triggers, GlobalAction® keeps business moving throughout the entire lifecycle of a document.

Security & Auditing

Granular security in GlobalSearch® provides user-based sign-in access, keeping databases, Archives, documents and feature-level security enforced. The built-in audit trail ensures your security is working by logging all document actions by date and user, providing full visibility into business output.
